OKIPAGE *8p Plus*

Digital LED printer

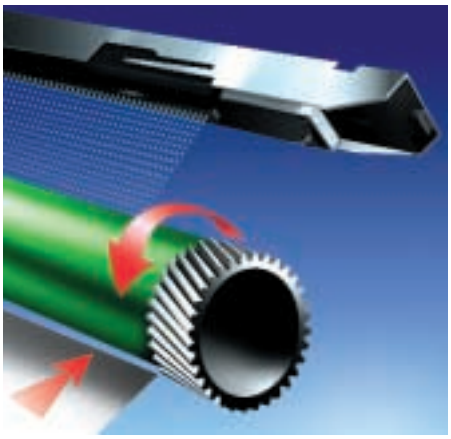
If you're looking for a personal printer, you'll want one that gives you the highest quality with the highest speed using minimum desktop space.

One that's as easy and as straightforward to set up as it is to use, and one that's compatible with the PC you use today. The **OKIPAGE** *8p Plus* has been designed to give you all these advantages, a design which makes it ideal for small office and home office users, or for individuals in larger organisations who need a personal desktop printer built to the highest standards.

Great looking documents direct from your desktop

The secret to the OKIPAGE *8p Plus's* outstanding quality and speed lies both in its 600 x 1200 dpi resolution and its unique Digital LED technology. This combined with 45 resident fonts gives you the flexibility and power to produce documents that look sharp, clean and confident on the page. The great advantage the OKIPAGE *8p Plus* has over its rivals is Oki's Digital LED printing technology. With far fewer moving parts than a conventional laser printer, it's less likely to go wrong, and fewer moving parts also mean higher accuracy, ensuring you get precision printing time after time.



Easy to set up with your system

Because the OKIPAGE *8p Plus* is a personal printer, Oki believe setting up is something you should be able to achieve without wading through manuals, ringing helplines or calling in IT specialists. And we've given it a broad range of compatibilities, including PCL6, PCL5e, IBM Proprinter and Epson FX, all using the bi-directional parallel interface familiar to all PC users, so it's almost certain to meet your needs.

Easy to set up with your software

Nor will software compatibility be a problem. The OKIPAGE *8p Plus* works seamlessly with DOS and Windows 3.1 through to Windows 98 and Windows NT4.0. Along with the interactive user guide and the relevant printer drivers, the printer's bundled software also includes a status monitor and a fully configured soft control panel that allows you to control the printer direct from your PC.

The printer status is easily visible on your PC screen at any time.

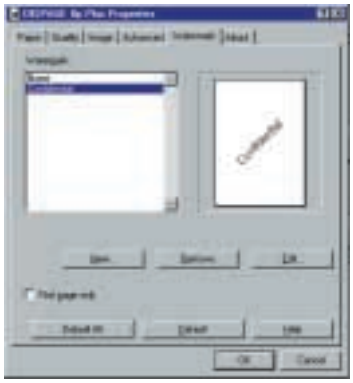
the high resolution answer to fast personal printing

AGE 8p Plus

Various paper settings are managed easily from your PC and Multiple-up printing is available should you need it.

Energy efficient, environmentally aware

The OKIPAGE *8p Plus* is authorised to carry the Energy Star EPA pollution preventer logo, showing that it combines important cost saving features with advanced environmental awareness. After remaining idle for some time it will put itself into sleep mode which much reduces its power requirements. It also ensures that it's back on line the instant you need it.

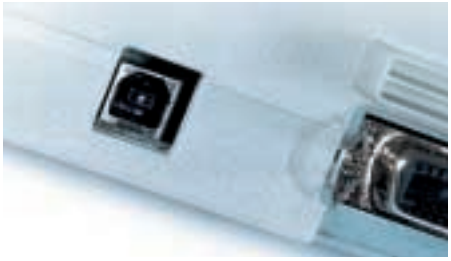


Even watermarks are created and printed easily.

Standard USB data interface

The industry standard Universal Serial Bus (USB) data interface, fitted on the OKIPAGE 8p Plus in addition to the common Centronic parallel interface IEEE1284, is compatible with Windows 98 and expands ease of connection with your PC.

USB B UNIVERSAL SERIAL BUS



People to People Technology

Oki aims to provide cost effective solutions to all personal and business communications needs. It is a policy that has supported our efforts for over 110 years and has helped ensure that every Oki product you buy is backed by the resources and knowledge of a major international company.

OKIPAGE *8p Plus* highlights

- **600 x 1200 dpi printing at 8 pages per minute**
- **Oki's advanced Digital LED printing technology**
- **Universal Serial Bus (USB) for Windows 98**
- **Advanced paper handling features**
- **2 Mbytes standard memory upgradable to 10 Mbytes**

TECHNICAL FEATURES

Precision Printing Technology

- Digital LED 8ppm page printer
- 1200 dpi class resolution
- Oki microfine spherical toner – crisper characters, improved grey scaling
- Oki Digital LED technology – superior reliability and print quality
- 45 scalable fonts

Flexible Paper Management

- Paper input – 100 sheet autofeeder
- Manual feed – for envelopes, irregular paper sizes and thicknesses
- Straight paper path – manual feed
- Face up paper stacker – 30 sheets

Paper Types and Sizes

- Weight – autofeed – 60 to 105 gsm, manual feed – 60 to 120 gsm
- Paper size – A4, B5, A5, A6, Letter, Executive, Legal
- Envelope size – Monarch, COM-10, COM-9, C5, DL

Enhanced Consumables Management

- Toner cartridge – approx. 1,500 pages A4 at 5% density
- Drum unit – approx. 10,000 pages A4 continuous
- 8,000 pages A4 (3 pages per job)
- Separate toner and drum unit

Performance Enhancement Technology

- Fast return to application
- MIPS R3000 Processor
- Centronics bi-directional parallel interface
- USB Interface
- 2MB standard memory – expandable to 10MB
- HP LaserJet 6P (PCL6) emulation
- IBM ProPrinter IIIXL & EPSON FX SIDM emulations
- Windows 3.1, Windows 95/98, and Windows NT compatible
- Universal Serial Bus (USB) for Windows 98

USB UNIVERSAL SERIAL BUS

Environmentally Friendly

- Virtually ozone free
- Toner recycling system
- Energy Star approved
- Designed to handle recycled paper
- Major parts marked for recycling

energy

Operating Conditions / Physical Specifications

- Printer Life: 30,000 pages or 5 years
- Recommended usage: 2,500 pages per month maximum
- Operating conditions: 10° to 32°C (50° to 90°F)
- Storage conditions: -10° to 43°C (14° to 110°F) at 10 to 90% humidity
- Mains voltage: 230V AC (+6%,-14%) or 240V AC (± 10%)
- Frequency: 50/60 Hz (± 2%)
- Dimensions: 267 x 324 x 350 mm (H x W x D)
- Weight: 4.3 kg
- Acoustic noise
  - operating : 50 dBA
  - standby : background level
  - power save: background level

Options

- 8MB RAM
